

Chemistry

Instructor: Trent Teague
Email: tteague@lincoln.k12.nc.us

Welcome to Chemistry! I'm excited about the start of a new semester and getting to know all of you. Chemistry is an exciting area of science to study as it explains much of our environment. In this class, we'll focus on the structure of matter and the forms it takes, the nature of light, chemical reactions, acids, bases, solutions, and more. Chemistry is also highly quantitative, meaning you'll need a good math background. I know that we will all work to have a successful class this semester!

Classroom Rules:

- Be on time.
- No food allowed in the classroom.
- Show respect to everyone and everything in the classroom.
- No electronic devices.
- Follow all safety guidelines.

Supplies:

Pencil/Pen, Notebook, Calculator (recommended, but not required)

Grading System:

Summative Assessments (Tests, projects, etc.).....75%
Formative Assessments (Quizzes, homework, lab assignments, etc.).....25%

Homework and Late Work:

At times, you will be asked to finish a lab assignment at home for homework. You may also be assigned extra practice as a graded assignment that will be finished at home. **Following the due date of the assignment, a student will receive a "0" as a grade for any missing work until it is turned into me.**

Labs:

Because chemistry is an upper-level science course, laboratory work will be an essential component. During all labs, students must follow **all** safety procedures that will be outlined during the first few days of school; any intentional failure to follow these guidelines will result in an office referral.

Tests/Quizzes:

Tests and quizzes will be given periodically throughout the semester. **Students may retake a test after review. If a student misses a test or quiz, they will have the opportunity to make it up; students will receive a "0" until then.** Corrections may be made to any test or quiz for half-credit.

I have read and understood the policies for Chemistry Honors for the 2021-2022 school year.
