Dear Parents,

Lincoln County Schools is excited to announce its partnership with Securly in safeguarding our students, your children.

Securly was chosen because we shared a vision of a safer, more productive digital world for our students. From web filtering to device management to self-harm detection, Securly is dedicated to keeping young minds healthy, engaged, and inspired. Additionally, we chose Securly for its strong adherence to data privacy and management laws.

Securly protects more than 10 million students across the US at school and at home, plus has over 2 million parents engaging in their child's activity on school devices.

Through this partnership, the students of Lincoln County Schools will be protected everywhere, on any device.

For questions, please contact your child's school.
